Symbiosis School of Sports Sciences

Video Performance Analysis

A session on video performance analysis was conducted by Mr. Adrian Fox, Country Head-India, Sportec by Hudl. The session was arranged for the batch 2018-20. The session included the details on the Video performance analysis which is also a part of Sports Technology specialization in Semester IV. The following was covered in the session:

1. Hardware and Software used for the video recording and analysis.
2. Right angles to capture the video.
3. Data collection
4. Video editing
5. Tagging of players
6. Competencies required to do the video analysis
7. Analysis of players
8. Generating report
9. Data visualization

The session was very engaging and the students learned the various aspects of the video performance analysis. This informative session also encouraged students to opt for Sports technology specialization.

An insight on Video analysis tools enhanced the knowledge of the students and upgraded them on the latest technologies used in the field of Sports.
